Change Font Color Of Links In Powerpoint Globally For Mac

For instance, it can increase readability, especially when there are many links in a short message, or it simply clashes with the other (background) colors in the currently selected template or stationery.. I'm also simply a bit bored with the blue Is there any way I can remove this default underline and change the color into for instance our company's color (green)? While the blue color and underline of hyperlinks makes them very recognizable for the receiver, there are good reasons to change it in some cases.

By default, whenever I create a hyperlink, Outlook turns the text color into blue and underlines it.. This is of course very recognizable but also not very modern as most web designs no longer underline hyperlinks.. Changing the hyperlink style To change the default color and/or underlining of hyperlinks, you can alter the defined style of hyperlinks while composing a new message.
